

ANNUAL
SCIENCE DAY

I ♥
SCIENCE

This Year's action-packed Science Day at St George's School was an amazing day of fun for both the adults and the children. There were exploding dragons and flying hovercrafts and helicopters, exciting investigations into the colours of the rainbow and plenty of delicious smelling bread! The children loved making the weird slimy concoction, 'Oobleck Slime' while trying to work out whether it was a solid or a liquid. Creating their own personalised toothpaste was an adventure for the children while creating enough carbon dioxide gas to blow up a balloon was a really fun activity. Lots of these ideas came from the web site www.sciencebob.com if you want to try some of these ideas at home.
